

You can use the cards to reflect on a project and plan RRI activities.
You can use the cards to facilitate a discussion about priorities for RRI in a research or application area.
Or do something completely different...

These cards have been developed by the Horizon Digital Economy Research Institute at the University of Nottingham in collaboration with the Trustworthy Autonomous Systems Hub, supported by UKRI [grants EP/T022493/1 and EP/V00784X/1]. They are based on Jirotko et al's AREA Plus Framework for Responsible Research and Innovation in ICT (DOI:10.1145/3064940), with refinements, additional questions and possible actions.
